

Nanotechnology Industries Association

Defining Nano!?

- Compliance Requirements & Market Impact of the EU Definition of 'Nanomaterials' -

WORKSHOP CONTENT

- The economic Impact of Nanotechnologies on current and future Markets
- The EU definition of the term 'Nanomaterial' :
 - Economic Impact
 - Legal Consequences
 - Technical Requirements
 - Trade Implications
 - Multinational Product Stewardship
- EU Member States Initiatives on Nanomaterial Regulations
- Technical Requirements on the Implementation of the EU Definition:
 - State-of-the-art Measurement & Detection Technologies
- Current proactive NIA-Programmes & Services supporting the Industries' Future Compliance

The publication of the EU's regulatory definition of the term 'nanomaterial' marks a watershed moment for the nanotechnology industries, raising questions, such as:

- Which market sectors utilising nanotechnologies will be affected by additional regulatory compliance?
- What is the economic impact on current and future applications of nanotechnologies?
- How will the EU definition be implemented (in European legislation and in the EU Member States)?
- What can companies do in the short term, in order to offset the cost of long-term compliance?

... find answers to these and many more questions at the

NIA - Workshop:

Defining Nano!?

- Compliance Requirements & Market Impact of the EU Definition of 'Nanomaterials' -

Wednesday, 30th November 2011
9:00 – 16:30

Huis van de Nederlandse Provincies
Provincie Limburg, Bureau Zuid-Nederland
Trierstraat 59-61
B-1040 Brussel, Belgium

To register for the event, send an E-mail to steffi.friedrichs@nanotechia.org (subject 'NIA-WORKSHOP 'Defining Nano!?'').

- Registered **NIA Members** attend the Workshop for **FREE**.
- Non-Members pay EURO 100.00.
